PROFILE

Data analyst with a finance edge. Skilled across the full analytics stack — SQL, Python, Excel, Power BI, and Snowflake — with real-world portfolio projects proving it. Git-versioned work. Prompt Engineering literacy. Built to bridge business context and data insight from day one.

SKILLS

- **SQL:** PostgreSQL, JOIN, UNION, Indexing, Aggregate Functions, Window Functions, Subqueries, CTE.
- **MS Excel:** Functions, Pivot Table, Power Query (ETL), Data Modeling, Dashboarding, M Language.
- **Power BI:** Dashboard Development, Data Modeling, DAX, Power Query (ETL), Interactive Reports.
- **Python:** Pandas, NumPy, Matplotlib, Seaborn, Data Wrangling, EDA, Jupyter Notebook.
- **Git:** Version Control, Branching, Merging, Pull Requests, GitHub, Commit Management.
- **Snowflake:** Data Warehousing, Virtual Warehouses, Data Sharing, Stages (Internal/External).
- **Prompt Engineering:** Techniques - Few-Shot, Chain of Thought, RCI Loop, MEGA, etc.

PROJECTS

Sales, Customer, and Product Analysis | [Link](#)

SQL

- Developed a multi-part SQL analytics project covering time-series trends, cumulative growth, and customer/product segmentation using window functions and CTEs.
- Built reusable report structures calculating business KPIs such as recency, average order value, and monthly spend.

Profit Performance Analysis | [Link](#)

Excel

- Analyzed 4 years of transactional data in Excel to identify profit trends by product, customer segment, and country.
- Built two interactive dashboards with 12+ business insights for data-driven strategic decisions on pricing, customer targeting, and regional performance.

Sales Performance Dashboard | [Link](#)

Power BI

- Built an interactive Power BI dashboard tracking gross profit performance across countries and product types using DAX measures, virtual tables, and Power Query.
- Applied advanced visuals including waterfall, treemap, and scatter charts with dynamic titles and conditional formatting.

Movie Correlation Analysis | [Link](#)

Python

- Performed exploratory data analysis and Pearson correlation analysis on a 6,000+ movie dataset using Python, Pandas, and Seaborn.
- Revealed that budget and votes hold the highest correlation with gross earnings, supported by heatmaps, scatter plots, and regression plots.

EDUCATION

Bachelor of Business Administration, Major – Finance

Passing Year 2026

Bangladesh Army International University of Science & Technology

CGPA: 3.60 / 4.00

ACHIEVEMENTS

- Passed SQL (Intermediate) certification test on Hackerrank
- Solved 400+ Python problems on Codewars.com
- Runner-up of Hult Prize at BAIUST competition
- Runner-Up of Intra-Department Futsal Tournament, DBA 2025

CERTIFICATIONS

- Data Analytics and Power BI Career Path by Interactive Cares
- Business Analytics with Excel by Microsoft
- Python for Data Analysis by Simplilearn
- Advanced SQL for Data Analysis by MindLuster
- Training for Snowflake by Simplilearn

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Team Leader

Hult Prize at BAIUST, 2026

Led my team B.silk to the final round and secured 2nd place at the Hult Prize at BAIUST competition for our business idea - Turning banana pith waste into sustainable fashion.

Head of the Organizing Team

Intra-Department Futsal Tournament, 2024

The Intra-Department Futsal Tournament, DBA 2024, was a vibrant event that fostered brotherhood among students and encouraged healthy competition for the ultimate title.

LANGUAGES & INTERESTS

Languages: Bangla (Native), English (Professional Proficiency), Hindi (Conversational), German (Basic).

Interests: Travelling, Football, Cycling, Gym, Running.
